

Hill Centre Towers I & II

Regina, Saskatchewan

Hill Centre Towers I & II are 20 storey, Class 'A' office towers located in downtown Regina. Hill Centre I (left) is comprised of 161,700 rentable square feet and Hill Centre II (right) consists of 185,000 rentable square feet. The unique design and construction of the twin towers addressed concerns pertaining to the shading of the F.W. Hill Mall and wind velocity. The quality and prime location of both buildings resulted in quick lease-up. The environmentally friendly towers are BOMA BESt Level 2 certified.

The office towers are connected by climate controlled pedways that are attached to the adjacent Hill Centre Parkade which houses 564 electrified parking stalls and is connected to downtown retail destinations the F.W. Hill Mall and Old City Hall Mall. Additionally, Hill Centre II contains one level of underground parking.
